

HIV in all Health Care	Community Action	Education	Planning Modifications
Mandatory testing during annual physicals	Forums to locate the target population (MSM, Trans, AA Women)	Information that is gathered from Case Managers and front-line staff should be implemented/ considered	Less red tape! Lots of policies and guidelines
Easier access to healthcare/ increased access to testing	Invite community leaders to take part in community action	Education to remove the stigma	Funding - politicized cuts and how to run around cuts
Do what we did for Covid! We'd end it!	More group sessions for PLWH - peer connections	Educate the community on adherence and U=U	More diversity in the planning councils/ decision-makers
More condom drives/ STD protection	Outreach to clubs, bars and other organizations	Educating our churches	More support less stress, guidelines, procedures) for HIV advocates, Case Managers, and front-line people
Better self-confidence leads to better self-love leads to better self-care	Promote round tables to better understand how clients take meds - reasons not compliant	Education for the Hispanic and Haitian communities on HIV and stigma	
Health care staff and social workers be more compassionate		Use social media/ dating sites to educate on HIV and U=U (heterosexual)	
		We plan it - let's do it!	
		Address condom fatigue - push U=U
