

Increased Community Engagement for Getting to Know You	Removing Barriers to Care	Getting to Zero	Truth - Removing Racial Disparities	Empowering Messaging	Unified Messaging for Sexual Health
Education at a younger grade level	Faster housing for PLWH	Free access to condoms and PrEP/PEP	Understanding what communities are being affected (for outreach)	Focus on "controlled virus" messaging	Better communication between doctors
Educate the community at large - reduce stigma		Trauma-informed counseling services specifically for PLWH	Stigma reduction		More celebrities get involved
HIV education at a younger age - before sexually active		Normalize sexual health assessments	Follow up teams to engage with clients after testing positive		More advertisement on social media (PrEP, awareness, etc.)
Sexual health information for youth (13-18)		More access to PrEP	Access to testing		Add HIV testing to physicals
Create safe spaces for people to speak openly about HIV		More support groups	Ease stigma in brown and black communities		Case managers go out with prevention teams
		More outreach testing	Promote HIV testing as a part of entering into a mutual relationship		Recognizing hot spots of HIV - more testing in hot spots
		More testing			All medical providers speaking out more about PrEP and prevention options
